

Employee Attrition Prediction - HR Director Summary

1. The strongest signals linked to employee exits are: JobRole_Research Director, JobRole_Laboratory Technician, JobRole_Sales Representative.
2. HR should prioritize retention in Sales, especially for the Sales Representative role, where exit rates are highest.
3. Salary matters, but it does not explain attrition alone; work conditions and role-specific pressures are also important.
4. Recommended action 1: launch targeted stay-interviews for high-risk teams within the first few years of employment.
5. Recommended action 2: strengthen manager coaching and work-life flexibility for teams with consistently high exits.
6. Build role-specific career progression plans so employees can see clear growth opportunities early in tenure.
7. Use monthly retention dashboards to track high-risk teams and evaluate whether interventions are reducing exits.
8. Model limitation: predictions are based on historical patterns and may miss personal or future business changes not captured in HR records.
